I've been away from the computer and this conversation has gotten all confused. If I may add some clarity...

Hector, the area we are talking about is about 8820 S Sepulveda. It is my crew that maintains the medians. They work for the WTC BID. We don't need anyone to fix anything for us. After John called me last night I called out an employee to shut off the water. We will repair the system.

I need to establish contact with whoever is your field supervisor for this area. Someone continues to change our timer settings, to turn off / turn on our water, and otherwise interfere. It is someone with a key because the system is locked, which is another problem. Who could it be? Can I just have our locks put on? That would solve the problem I guess.

We thought it was Tropical Creations (I think that is the name) but the owner has been told and has apparently agreed to stay out of that area. Could it be his employee hasn't gotten the memo yet? Could it be DWP? We don't know.

As of this week we now have 2 broken pipes / sprinkler heads because of this interference and 1 landscape area that has not been watered.

When can your supervisor & I meet on site?

Thanks Hector.

John,

UFD does not perform any work south of Manchester. Any work needed on the south medians including controller programming will need to be performed by the BID contractor.

Best Regards,

Hector,

It is SOUTH of Manchester Ave.

It is now 1:30 PM and I just drove by that area and there is no water funning on the street.

But it s worth while taking a look at it.

John

John/Donald,
8900 blk of Sepulveda is north of Manchester and UFD responsibility, but it appears the Ralphs is located south of Manchester.

BSS/UFD is not responsible for the irrigation systems on any of the medians south of Manchester.

Please confirm location.

Thanks

HECTOR,

I called Don last night about water running over the curb from the median across the street from the Ralph's grocery store south of Manchester. Water was running through the south bound traffic lanes.

Hello Donald,

Are you referring to the median(s) on Sepulveda north or south of Manchester?

We are having a real problem with the new irrigation system in the medians at the Westchester Town Center. I think it is simply a lack of coordination between the City (or its contractor) and the Business Improvement District's contractor. The result is lack of water for our plant material, broken pipes, unnecessary call outs, and frustration. Can we meet with all of your affected supervisors and

our BID representatives to resolve this ASAP?

Thanks Hector. (I understand you may not be the appropriate supervisor that we meet with but you are the only person other than Greg Monfette and Luis Torres that I've worked with on the maintenance side. I'm counting on your guidance to direct us properly.)
